

What are the current models of care, and the resources needed to support them, for the management of HIV in primary care in the UK to inform optimal model development for people living with HIV.

Q1. Can you please describe to me the model of care for HIV in your area?

Q2. Can you describe to me the involvement of primary care in this model?

- Primary care awareness of HIV?
- Primary care involvement in HIV testing?
- Support systems available for primary care practitioners?
- Communication channels between primary and secondary care?

Q3. Is there a liason/outreach service for HIV in your area?

Q4. Is there an HIV network in your area? How does it look?

Q5. Can you describe any Peer support activity in your area?
